

Report

about the ISE Satellite Student Regional Symposium on Electrochemistry – 2nd ISE Satellite Student Regional Symposium on Electrochemistry in Ukraine «Promising Materials and Processes in Applied Electrochemistry»

2nd ISE Satellite Student Regional Symposium on Electrochemistry in Ukraine «Promising Materials and Processes in Applied Electrochemistry» was held on 18th May at Kyiv National University of Technologies and Design (KNUTD) as part of celebration of «The Day of Science» and «The Day of Europe» in Ukraine.

The event was attended by over 50 scientists from 5 countries (Ukraine, Belarus, Lithuania, Greece and The Netherlands).

The Symposium was opened by KNUTD first vice-rector, prof. Viktor Kaplun, dean of the Faculty of Chemical and Biopharmaceutical Technologies, prof. Olga Baula, head of the Electrochemical Power Engineering and Chemistry department, prof. Viacheslav Barsukov, head of the electrochemical technology department of I. Sikorsky Kyiv Polytechnic Institute, prof. Olga Linyucheva and head of the department for chemistry, electrochemical technology and materials for electronic equipment of Belarusian State Technological University, prof. O. Chernik.

After that young scientists have presented their oral and poster presentations and answered the questions.

Young scientists contributed 39 presentations and published the corresponding papers in the Collective Monograph.

During the sessions students and young participants presented their findings and had fruitful discussions with each other, as well as with world-class scientists.

The best presentations of young scientists were awarded by special Diplomas of Symposium Organizing Committee.

All participants received the Certificates and the copies of Collective Monograph with full research papers. Hospitality services provided delicious lunch and coffee-breaks.

As the scientific outcome of the Symposium the following collective monograph was published: Promising Materials and Processes in Applied Electrochemistry/ Ed's: V.Z. Barsukov, Yu.V. Borysenko, O.V. Linyucheva, I.V. Senyk, V.G. Khomenko; Kyiv, KNUTD, 2017 - 270 pages; ISBN 978-966-7972-79-0. This monograph contains 39 research papers with an active participation of students, post-graduate students and young scientists.

All students and young scientists are very grateful ISE for the sponsor's support of this very important event in Ukraine and hope to continue this remarkable tradition on the next years.

On behalf of Symposium Organizing Committee,

Ilona Senyk, PhD.

Viacheslav Barsukov, Prof.Dr.
